MRGO	Mississippi River - Gulf Outlet
HWY	Highway
IHNC	Inner Harbor Navigation Canal
F/V	Fishing Vessel
AP	Assigned Position
CPA	Closest Point of Approach
COTP	Captain of The Port

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jtfts, or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the www.AmericasWaterwayWatch.org, the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH.

LNM: DPW

NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-seconds characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

LNM: DPW/PRIV AIDS

SPECIAL NOTICE - HURRICANE SEASON

The hurricane season is considered to extend from June 1, 2016 through November 30, 2016. Tropical storms and hurricanes often develop with little warning. Extensive damage to small craft often results in loss of life. All mariners, particularly operators of small fishing vessels, are reminded that advanced planning which might prevent loss of vessel and crew should include:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures.
- (b) Presailing check of vessel, machinery, and equipment for seaworthiness.
- (c) Installation of strong ground tackle.
- (d) Review of storm center evacuation procedures.
- (e) Knowledge of nearest hurricane shelter or port.
- (f) Constant radio watch on VHF-FM Channel 16 and frequent monitoring of VHF-FM weather channels for National Weather Service Broadcasts.

Due to tropical storms and hurricanes, mariners should be aware that aids to navigation along the coasts of Florida, Alabama, Mississippi, Louisiana and Texas, and on structures in the Gulf of Mexico may have been damaged or destroyed. Lighted and unlighted buoys may have been moved from charted position, damaged, sunk, extinguished, or otherwise made inoperative. Mariners should not rely completely upon the position or operation of an aid to navigation, but should also employ such other methods of determining position as may be available. Wrecks and submerged obstructions may have been moved from charted locations and pipelines may become uncovered or moved, due to the force of storm surges. Storm surge and winds may create shoals in affected waters. The U.S. Aids to Navigation system marking wrecks and obstructions is intended for use with nautical charts. The exact meaning of a particular aid to navigation may not be clear to the mariner unless the appropriate nautical chart is consulted. Virtually all U.S. lateral marks are located in Iala Region B and follow the traditional 3R rule of red,

right, returning. In U.S. waters, returning from seaward and proceeding toward the head of navigation is generally considered as moving westerly along the Gulf Coast. Mariners should exercise caution and report aid to navigation discrepancies and hazards to navigation to the nearest Coast Guard unit.

During the hurricane season, drawbridges along the coast may deviate from normal operating procedures. Some bridges may be unable to open because of high winds. Others may be authorized extended closed periods to facilitate evacuation of land traffic. Mariners should anticipate bridge closures by listening to the National Weather Service and Coast Guard Broadcasts on hurricane conditions. Because of the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

Locks and Navigation Structures are operated to pass navigation until such time, that water levels and wind conditions warrant operations unsafe. The structures are then closed in accordance with hurricane preparation procedures. Mariners will be given as much notice as possible when structures are to be closed. However, these structures may be closed on short notice well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible.

LNM: 21-16

SPECIAL NOTICE - HURRICANE SEASON

Mariners are advised that the Hurricane Season extends from June 1, 2016 to November 30, 2016.

Locks and Navigation Structures operated by the U.S. Army Corps of Engineers will attempt to pass navigation until such time that water levels and wind conditions render operations unsafe.

The structures are then closed in accordance with Hurricane procedures. Be advised that this includes the Harvey Canal Floodgate, located in the Harvey Canal immediately south of the Lapalco Bridge at mile marker 2.8 of the Gulf Intracoastal Waterway (GIWW) West of Harvey Lock (WHL).

Mariners will be given as much notice as possible when structures are to be closed. However, these structures may be closed on short notice well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible.

General information for the New Orleans District can be found at:
<http://www.mvn.usace.army.mil>

Mariners using the following structures should consult the respective agency listed below for updates:

- * GIWW Sector Gate (on the Inner Harbor Navigation Canal Surge Barrier) - Orleans Levee District
- * Bayou Bienvenue Floodgate - Orleans Levee District
- * Bayou Bienvenue Lift Gate - Orleans Levee District
- * Seabrook Sector Gate - Orleans Levee District
- * Bayou Dupre Floodgate - Lake Borgne Levee District
- * GIWW West Closure Complex (WCC) - West Jefferson Levee District
- * Bayou Segnette Barge Gate - West Jefferson Levee District
- * Bayou Verret Floodgate (also known as the Sellers Canal Floodgate) - St. Charles Parish
- * Hero Canal Stoplog Gate - Plaquemines Parish
- * Empire Lock - Plaquemines Parish
- * Ostrica Lock - Plaquemines Parish
- * Empire Floodgate - Plaquemines Parish
- * Larose Floodgate - Lafourche Parish
- * Leon Theriot Floodgate (Golden Meadow) - Lafourche Parish.

Attached as an enclosure to this LNM, is U.S. Coast Guard Marine Safety Unit Morgan City/Houma MSIB 009-16, regarding Hurricane Season 2016.

LNM: 20-16

U.S. COAST GUARD MARINE SAFETY UNIT PORT ARTHUR MARINE SAFETY INFORMATION BULLETIN - HURRICANE SEASON 2016

Attached as an enclosure to this LNM, is U.S. Coast Guard Marine Safety Unit Port Arthur MSIB 006-16, regarding Hurricane Season 2016.

LNM: 22-16

U.S. COAST GUARD SECTOR NEW ORLEANS MARINE SAFETY INFORMATION BULLETIN - HURRICANE SEASON

Attached as an enclosure to this LNM, is U.S. Coast Guard Sector New Orleans MSIB 068-16, regarding Hurricane Season 2016.

LNM: 23-16

DGPS TESTING - UPDATE

Continuing until further notice, the Eglin Air Force Base, Florida, DGPS is unusable and on August 4, 2016, Eglin Air Force Base, Florida, DGPS site will permanently cease broadcasting corrections.

LNM: 29-16

LA - RED RIVER - FORT POLK, LOUISIANA - GPS TESTING

Commencing on August 17, 2016, from 0800Z until 1100Z, August 24, 2016, from 2000Z until 2100Z, August 29, 2016, from 1900Z until 2200Z and then again on August 30, 2016, from 0800Z until 1100Z, each day, the GPS navigation signal may be unreliable due to testing on GPS frequencies used by shipboard navigation and handheld systems. Systems that rely on GPS, such as L1/L2, may be affected at an approximate testing center of 31-05-35.16N 093-03-50.04W, with a possible impact radius of 48 nautical miles from the center point. More information is available at the U.S. Coast Guard Navigation Center Website, www.navcen.uscg.gov. During these periods, GPS users are encouraged to report any GPS outages that they may experience to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

LNM: 29-16

MS - LA - BRETON SOUND - CHANDELEUR GIWW ALTERNATE ROUTE - Aids to Navigation

The establishment of the AIS Aids to Navigation (Virtual Aids) has been delayed in the Breton Sound/Chandeleur GIWW Alternate Temporary Route, due to equipment availability. Mariners will be notified as soon as the equipment is established. The channel is clearly marked with physical aids to safely navigate.

Charts: 11363 11373

LNM: 27-16

GULF OF MEXICO - VHF-FM RADIO SITE OUTAGE

Mariners are advised that U.S. Coast Guard Sector Mobile, AL., VHF-FM radio sites will experience an outage beginning at 0200 CST on July 21, 2016, for approximately 70-minutes. The affected region will include all Coastal waters of Mississippi and Alabama, as well as the Panhandle of Florida, east through Taylor County, FL. Mariners transiting these areas may experience difficulty contacting the U.S. Coast Guard on VHF-FM radio during this period.

LNM: 29-16

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only.

It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Main Panel 2245 NEW YORK HARBOR					CGD01	
(Temp)	ADD	NATIONAL DOCK CHANNEL BUOY 3			at 40-41-09.001N	074-02-48.001W
		Green can				
Corrective Action	Object of Corrective Action		Position			

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION V - ADVANCE NOTICES

This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas.

SUMMARY OF ADVANCED APPROVED PROJECTS

Approved Project(s)	Project Date	Ref. LNM
None		

Advance Notice(s)

FL – WEST BAY TO SANTA ROSA SOUND – Choctawhatchee Bay

The following change will be made the week of August 29, 2016.
Change Choctawhatchee Bay Entrance Daybeacon 10 (LLNR-4580) to
Choctawhatchee Bay Entrance Buoy 10 (LLNR 4580) in approximate
position 30-23-31.876N/086-30-51.265W, showing a Red nun.
Chart 11385

LNM: 08-16-29D

TX – CORPUS CHRISTI HARBOR – Corpus Christi Channel

The following changes will be made the week of September 5, 2016.
Remove 4KRW Range Board Industrial Canal RFL (LLNR-28825).
Remove 6KRW Range Board Industrial Canal RRL (LLNR-28830).

Charts: 11309 11311

LNM: 08-16-34D

LA – MISSISSIPPI RIVER – Venice to New Orleans – Breton Sound – Bayou Terre Aux Boeufs

The following changes will be made the week of September 5, 2016.
Change Bayou Terre Aux Boeufs Light 2 (LLNR-12355) to Bayou Terre Aux Boeufs Daybeacon 2 (LLNR-12355) in approximate position 29-37-13.261N/089-29-11.695W.
Change Bayou Terre Aux Boeufs Light 6 (LLNR-12370) to Bayou Terre Aux Boeufs Daybeacon 6 (LLNR-12370) in approximate position 29-38-03.372N/089-32-25.433W.
Change Bayou Terre Aux Boeufs Light 7 (LLNR-12375) to Bayou Terre Aux Boeufs Daybeacon 7 (LLNR-12375) in approximate position 29-39-31.058N/089-33-50.453W.

Chart 11364

LNM: 08-16-38D

TX – MATAGORDA BAY – Matagorda Bay – Matagorda Ship Channel

The following change will be made the week of September 5, 2016.
Change Port Lavaca Junction Daybeacon PL (LLNR-27485) to Port Lavaca Junction Light PL (LLNR-27485) in approximate position 28-35-50.039N/096-34-00.254W, showing FL (2+1)G 6s, Focal Height 17ft, Nominal Range 3NM, JG on pile, Ra ref.

Chart 11317

LNM: 08-16-39D

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

PROPOSED WATERWAY PROJECTS OPEN FOR PUBLIC COMMENT

<u>Proposed Project(s)</u>	<u>Closing</u>	<u>Docket No.</u>	<u>Ref. LNM</u>
None			

Proposed Change Notice(s)

TX – CORPUS CHRISTI BAY – La Quinta Channel

Change light color of La Quinta Channel Entrance Range Front Light (LLNR-28935) from Red to White.
Change light color of La Quinta Channel Entrance Range Rear Light (LLNR-28940) from Red to White.
Comments will be taken until July 26, 2016.

Chart 11309

LNM: 08-16-44D

TX – CORPUS CHRISTI HARBOR – Tule Lake Channel

Change Tule Lake Channel Leading Light (LLNR-28845) in position 27-48-55.150N, 097-27-44.763W to Tule Lake Channel Sector Light (LLNR-28845).
Comments will be taken until July 26, 2016.

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

FL - GULF OF MEXICO - Naval Testing

Continuing until approximately December 31, 2016, the U.S. Navy will be conducting testing operations in the Gulf of Mexico, in approximate positions:

29-59-44N 085-31-20W

29-55-12N 085-26-50W

29-58-06N 085-32-05W

29-56-12N 085-30-54W

It is requested that all vessel traffic avoid the Tyndall Air Force Base Crooked Island restricted air and water space R-2905A and R-2905B. The U.S. Navy support and test vessels will monitor VHF-FM Channel 16. Mariners are urged to transit the area with caution and heed all instructions from the U.S. Navy support and test vessels. For additional information, mariners can contact the U.S. Coast Guard Sector Mobile, at (251) 441-5976.

FL - GULF OF MEXICO - U.S. Navy Testing

Continuing until approximately December 31, 2016, the U.S. Navy will be conducting inert Airborne Mine Neutralization System (AMNS) underwater mine destructor testing in the Gulf of Mexico. The inert AMNS mine destructors are silver and orange, 3 feet long, 6 inches in diameter, weighs approximately 2 pounds in water and 35 pounds in air. Inert mine surrogate bottom and tethered shapes, along with inert AMNS mine destructors will be deployed, operated and tested in the below test area during this period. It is requested that all vessels maintain 1 nautical mile from closest point of approach (CPA) of all vessels while operations are in progress. All U.S. Navy/U.S. Navy contracted AMNS support vessels will be monitoring VHF-FM Channel 16. The corners of the test areas are bound by the following approximate positions:

AMNS TANGO Circle 100-foot Shallow Target Field:

29-56-25.2N 085-54-36W,

29-58-55.2N 085-54-36W,

FL - FIVE MILE (CINCO) BAYOU - Bridge Rehabilitation

The SR 85 Bridge across Five Mile Bayou (Cinco) Bayou, mile 0.7, near Fort Walton in Okaloosa County, Florida, bridge rehabilitation work continues, Monday through Saturday, from 7:00 a.m. until 5:00 p.m. Work is being done on Bent 2, Bent 10 and Bent 16. The navigation channel is located between Bent 9 and Bent 11, as indicated by the navigation lights for the safe passage of motor vessels. The bridge has a total of 17 bents. Three barges will be placed on each side of the bents (totaling six) with a seventh barge on the end on the east side of the bent. Each bent will take approximately 10 days. Mariners should use caution while traveling the channel at Bent 9 for the next two weeks as there will be a reduction within the channel and work has been extended to be completed by July 31, 2016. The barges will be properly lit according to "Inland Navigational Rule of 1980." Mariners should avoid the area, travel through the navigation spans and urged to proceed at slowest safe speed with extreme caution. Anyone needing assistance should call these contact numbers (850) 377-2219 or (850) 408-1242. Superior Construction will be monitoring VHF-FM Channel 16.

FL - CHOCTAWHATCHEE BAY - Fireworks Display

Legendary Incorporated will be conducting the Harbor Walk's 2016 Season of fireworks displays on multiple dates continuing through December 31, 2016. Specific dates will be announced by Broadcast Notice to Mariners. Displays start at 9:00 p.m. until 9:30 p.m., in the East Pass to Choctawhatchee Bay. The fireworks will be launched from a barge in approximate position 30-23-02.77N 086-30-52.43W. Mariners are urged to remain a minimum of 700 feet from the barge due to hazards associated with fireworks. For up-to-date information, mariners can contact the U.S. Coast Guard Sector Mobile, at (251) 441-5976.

Charts: 11385 11388

LNM: 19-16

FL - GULF OF MEXICO - Pensacola Beach Restoration Project/Dredge Operation

Continuing until approximately August 31, 2016, Weeks Marine, Inc. will be mobilizing support equipment (supply/anchor barge, pipeline, etc.) into Pensacola Bay area. All support equipment will be anchored just North of Bay Channel between following approximate positions: 30-22-18.45N 087-14-49.66W and 30-23-05.38N 087-14-00.19W

Commencing approximately June 22, 2016 and continuing until August 13, 2016, the Hopper Dredges R.N. WEEKS, B.E. LINDHOLM and attendant plant will be operating 4 nautical miles offshore of Pensacola Beach, FL, in the Gulf of Mexico bound by the following approximate positions:

30-17-09.00N 087-07-00.1W

30-17-09.00N 087-05-48.1W

30-16-17.8N 087-05-48.1W and,

30-16-17.8N 087-07-00.1W

Dredge pipeline will be prepared in the staging area and then relocated offshore of Pensacola Beach placement area and submerged into four different pipeline corridors, bound by the following approximate positions:

30-19-25.01N 087-11-13.80W,

30-18-34.78N 087-11-04.90W,

30-21-00.61N 087-02-39.76W and,

30-20-04.00N 087-02-22.72W

The submerged and floating pipeline will be lighted at night according to U.S. Coast Guard regulations. Dredge material will be transported by hopper dredges to a discharge location within the limits of the above mentioned subline location, to be pumped to the beach through a combination of floating and submerged pipeline. The submerged pipeline will be removed at the completion of dredging activities. The Hopper Dredges R.N. WEEKS, B.E. LINDHOLM and attendant plant will operate 24-hours a day, 7-days a week. The Dredge and attendant plant will be lighted at night according to U.S. Coast Guard regulations. The Hopper Dredges R.N. WEEKS, B.E. LINDHOLM and attendant plant will be monitoring VHF-FM Channels 16 or 67. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

FL - SANTA ROSA SOUND - Fireworks Display

The Portofino Island Resort will be conducting their 2016 Season of Fireworks display on multiple dates continuing through December 31, 2016. Specific dates will be announced by Broadcast Notice to Mariners. Displays begin at 9:00 p.m. until 9:30 p.m. The fireworks will be launched from a floating platform anchored 500 feet off the end of the resort's pier. Mariners are urged to remain a minimum of 200 yards from the floating platform due to hazards associated with fireworks. For up-to-date information, mariners can contact U.S. Coast Guard Sector Mobile Waterways Management Branch at (251) 441-5976.

Chart 11385

LNM: 09-16

FL - GARNIERS BAYOU - Bridge Rehabilitation

The SR 85 Bridge across Garniers Bayou, mile 1.0, near Fort Walton in Okaloosa County, Florida, is presently rehabilitating the bridge, working Monday through Saturday, from 7:00 a.m. until 5:00 p.m., until mid August 2016. On Bent 23, the work includes jack step, jacking bridge and demo concrete repairs. On or about July 17, 2016, the contractor will move across the waterway to Bent 1 to complete the same tasks. The navigation channel is located between Bent 13 and 14, as indicated by the navigation lights for the safe passage of motor vessels. Mariners should avoid the area, travel through the navigation spans and are urged to proceed at slowest safe speed with extreme caution. Anyone needing assistance should call these contact numbers (850) 377-2219 or (850) 408-1242. Superior Construction will be monitoring VHF-FM Channel 16.

Charts: 11385 11388

LNM: 28-16

FL - GIWW - THE NARROWS - Bridge Painting Operations

Continuing until further notice a contractor will be cleaning and painting the SR 292 fixed bridge across the Gulf Intracoastal Waterway, Mile 171.9, EHL, near Gulf Beach, Escambia County, Florida, and the work will continue through November 2016. A containment system/platform will be placed across the entire bridge. However, across the areas outside of the navigable span, the vertical clearance of the bridge will be reduced by 5 feet. Across the navigable span of the bridge, vertical clearance will be reduced by 4 feet, allowing for 69 feet of vertical clearance. However, the contractor will raise the containment system over half of the navigable span to a height that reduces vertical clearance by 2 feet, allowing for 71 feet of vertical clearance, when not working on that half of the navigable span. At no time will there be a 4-foot reduction across the entire center of navigable span (over the fender system).

When the work is completed in one half of the navigable span, the side that has the 4-foot reduction will be raised to a 2-foot reduction in clearance until all work is completed and the platform is removed. Navigation lighting will be maintained throughout the work. Mariners should be alert for VERTICAL CLEARANCE REDUCTIONS FOR THE ENTIRE DURATION OF THIS PROJECT and pass with extreme caution at slowest safe speed to minimize wake. If mariners need the containment system raised to a height that allows for more vertical clearance than described above, they may do so with six hours notice by contacting the Nick Parianos at (850) 445-3870, or in the alternative, Theo Skoutelis at (727) 946-1761.

Charts: 11378 11382

LNM: 15-16

FL - GIWW - SANTA ROSA SOUND - Fender System Repair

Fender System repairs are planned for July 27, 2016 through August 15, 2016, from 8:00 a.m. and 5:00 p.m., daily on the County Road 399 Bridge, also known as the Bob Sikes Bridge, across the GIWW, Mile 189.1, EHL, between Gulf Breeze and Pensacola Beach, Florida, will undergo bridge inspections.

M/V REEF BUILDER will be monitoring VHF-FM Channels 13 or 16 along with a barge measuring 130-foot by 30-foot. The work will be within the channel and partial blockage may be intermittent. The horizontal clearance is 150 feet between fenders. In case of an emergency or if the need for the equipment's temporary removal arises, the point of contact for removal of this equipment is Keith Phillips, who can be reached at (850) 572-5088. Mariners should be alert for equipment in the waterway at all times and pass exercising extreme caution at slowest safe speed to minimize wake.

FL - GRANDE BAYOU - Bridge Demolition and New Bridge Construction

Demolition continues and the replacement of the new bridge construction has begun on the CR 292A (Sunset Ave.) crossing Grande Bayou, mile 0.9, in Warrington (near Pensacola), Escambia County, Florida. Setting Span 5 girders and completing demo work and working on Bent #6. Beginning overhang on Spans 1 and 2. A barge 80 feet by 80 feet has been placed to assist in the demolition of the old bridge moving in a westerly direction and at 50% complete. The crane barges are being used to set the girders, therefore, there are two lattice boom crawler crane barges used for the project, measuring (1) 60 feet by 60 feet and (2) 80 feet by 70 feet. Onsite Tug Boat "MISS AMORY" and Tug Boat #9027 will be secured using hydraulically operated spuds with the proper lighting prescribed by the "Inland Navigational Rules of 1980". The tugs will be monitoring VHF-FM Channel 16, during working hours. The project manager can be reached at (334) 319-7006. Mariners should use the marked temporary navigation channel between Pier #2 and #3, for transit at their slowest safe speed. This channel has a horizontal measurement of 34.5 feet and a vertical clearance of 7.4 feet. Construction of new bridge continues through the end of July 2016.

LA - GULF OF MEXICO - Drilling Operations

Continuing until further notice, the M/V SEADRILL WEST VELA will be conducting drilling operations at well 007, in the Mississippi Canyon Area, Block 776, in approximate position 28-12-57.4N 088-33-30.0W. Work will be conducted 24-hours a day, 7-days a week. The M/V SEADRILL WEST VELA will be monitoring VHF-FM Channels 6 or 16. Mariners are urged to keep a wide berth and maintain a minimum CPA of 2 nautical miles.

Charts: 411 1115A 11360

LNM: 16-16

LA - GULF OF MEXICO - Dredge Operation

Continuing until approximately December 15, 2016, Great Lakes Dredge & Dock Company will be conducting dredging operations and the placement of marsh fill and beach fill on the barrier island of Chenier Ronquille in the Gulf of Mexico for the Chenier Ronquille Barrier Island Restoration Project (BA-76). Sand and marsh fill will be dredged from a distance of one to four nautical miles offshore in designated borrow areas and will be hydraulically placed with a hydraulic dredge via pipeline. The Project is comprised of offshore borrow areas and the existing barrier island of Chenier Ronquille, in approximate positions:

29-20-00.30N 089-48-14.87W

29-19-55.93N 089-46-43.13W

29-16-49.46N 089-47-02.89W

29-17-03.85N 089-52-09.44W and

29-18-52.82N 089-50-44.58W

In order to pump dredged material to shore a 30-foot steel subline will be placed on the bottom between the borrow area and the beach fill area. Hydrographic survey results show water depths ranging from 5.8 feet to 10.2 feet below NAVD88 along the subline corridor. The presence of the subline will limit vertical clearance to between 3.0 feet and 7.5 feet during low tide. The entire length of subline will be at depths less than 20 feet and therefore will be marked with yellow can buoys with blinking yellow lights approximately every 2,300 feet per contract specifications in accordance with U.S. Coast Guard Navigation Rules. In addition, orange Norwegian buoys will be placed approximately every 800 feet to more clearly define the location of submerged pipeline during daylight hours. The submerged line can be closely approximated to be between points 1 and 4:

Point 1 – 29-19-01.46N 089-48-39.99W

Point 4 – 29-18-09.65N 089-49-47.76W

Small craft and survey vessels are performing sporadic work in the Project Location that began the second week of February 2016 and will continue through project completion. Mobilization of land-based equipment for primary dike construction took place in April 2016 and involved tug boats, followed by primary dike construction within the bounds of the Chenier Ronquille barrier island. Mobilization of dredge equipment and pipelines began in May of 2016 and will continue up to the start of dredging and will include tug boats, derrick barges, survey vessels, and various dredge support equipment. Dredge fill activities will begin in the Summer of 2016 and will take approximately four to five months to complete; equipment will include tug boats, derrick barges, survey vessels, and various dredge support equipment. Dredge equipment demobilization will occur after dredging has finished and is expected to take two months; equipment will include tug boats, derrick barges, survey vessels, and various dredge support equipment. For up-to-date information, mariners can contact Mr. Trevor Hill, at (630) 272-2236 or THill@gldd.com.

LA - LAKE PONTCHARTRAIN - US 11 Bridge Rehabilitation Outside the Main Channel Spans

A contractor will begin rehabilitation work on the US 11 Bascule Bridge across Lake Pontchartrain between New Orleans and Slidell, Orleans and St. Tammany Parishes, Louisiana. The contractor will be working Monday through Friday from, 6:30 a.m. until 5:30 p.m. Work on the project will begin on the Slidell side (north) and consist of inspections, measuring of cracks, sand blasting, spall repairs and wrapping of the piers and caps as necessary. The contractor will install approximately 800 feet of scaffolding from Bent 1 to Bent 22. The scaffolding will stretch across the entirety of the section and will reduce the vertical clearance within these spans by 8 feet, thus eliminating the availability of these spans for the use of recreational boaters. The work area will be marked by Danger buoys approximately 50 feet on either side of the bridge, marking an exclusion zone for vessels to stay out of the work zone. The buoys will be spaced approximately 200 feet apart and will mark the entire length of the work area. The buoys will be lighted at night with FI W 2.5 sec lights. Mariners should avoid this area at all times.

Additionally, the contractor will conduct additional work from three work barges (2 measuring 40 feet x 40 feet, 1 measuring 100 feet x 30 feet with a crane height of 25 feet). When the contractor is not working at night and over the weekends, the barges will be grouped together and spudded down away from the navigation span and near the work area. This equipment will be lighted by fixed white lights on each outward corner as required. During the work day, the Tug JO ANN SIMS will monitor VHF-FM Channel 16. The L&A Contracting Company is the contractor on the project and can be reached at (601) 270-7704, 24-hours a day. This project will take approximately 48 months to complete. In conjunction with this work, additional work beneath the bridge on the New Orleans side (south) will have divers placing wraps during daylight hours, issued in a separate Local Notice to Mariners.

LNM: 18-16

LA - MISSISSIPPI RIVER - Mile 95.7, AHOP - NEW ORLEANS HARBOR - Sandblasting/Painting

Until further notice, the new US 90 (Crescent City Connection/GNO) eastbound Bridge across the Mississippi River, Mile 95.7, AHOP, in Orleans and Jefferson Parishes, Louisiana will undergo sandblasting and painting to the underside of the bridge. Presently, work has begun and the containment system for the portions of the bridge outside of the navigation span on the right descending bank has been placed below the bridge. The contractor continues to sandblast within the main channel span. Presently, they are moving from the upstream side of the bridge to the downstream side of the bridge and, beginning from the right descending bank pier and moving towards the left descending bank pier. The contractor has divided the work into five (5) 300-foot sections within the navigable span and for the purposes of the project will be described as sections A, B, C, D, and E. During the project, the containment system throughout the project will reduce the vertical clearance by one foot at all times and by up to three feet in the lettered section that the contractor will be working within. The contractor has completed Section A and Section B. They are presently finishing Section C this week. They are now moving to Section D and E extending the work until July 15, 2016. While working within a section, the containment system may further reduce the published vertical clearance by a total of three feet. If a mariner needs the containment system raised to only the one foot reduction, they may do so with four hours notice by contacting the Vessel Traffic Service at (504) 365-2514.

The work schedule provided indicates that each section should take approximately two weeks to complete and the entire section within the main channel span should be completed by early May, weather permitting. The schedule will be updated as necessary. The published vertical clearance of the bridge is 150 feet above mean high water, elevation 20 feet (or 170 feet minus the Carrollton Gauge). The most accurate and up to date vertical clearance information for the bridge can be found on the NOAA website at:
<https://tidesandcurrents.noaa.gov/ports/ports.html?id=8761847&mode=airgap>.

YOU ARE REMINDED that this number has NOT BEEN adjusted to reflect the vertical clearance reduction caused by the containment system.

The information provided will be updated as new information becomes available. Mariners are advised to use extreme caution when traversing the project area. Mariners with questions should contact the Eighth Coast Guard Bridge Administration Branch at (504) 671-2128. Additional information may be provided as necessary by the contractor, Mr. Yianni Koullios, (330) 272-1806 with INTEC (contractor POC), or the New Orleans VTS (Algiers Point traffic control) (504) 365-2514.

LA - BAYOU LAFOURCHE - Old LA 1 Bascule Bridge Pier 1 Removal at Leeville, LA

A contractor has begun removing the remains of pier 1 of the old LA1 Bascule Bridge across Bayou Lafourche, mile 13.3 at Leeville, Lafourche Parish, LA. The contractor is working on the right descending bank just upstream of the new LA 1 fixed bridge. The contractor will be working from 6:00 a.m. to 8:00 p.m., daily. At night, the work barge will be relocated to near the right descending bank, secured and properly lighted. The method of removal consists of utilizing a drop hammer to pulverize the slab in all areas within reach of the crane working north to south longitudinally along the east most edge of the slab and then perform air lift operations. The remains of the pier will be pulverized down to -22 feet Mean Sea Level. All pulverized parts will be allowed to settle into the waterway on the bottom into the scour hole next to the pier.

Divers will also be used in the project removal. The project requires a spud barge, 40-foot x 100-foot, an aluminum work boat under 30 feet and Tug Boat MICHAEL T, monitoring VHF-FM Channels 8 or 13. The contractor on site is Anders Construction and M/V CAPTAIN JEAN is a point of contact on site 24-hours a day, at (228) 304-5408. The main navigation channel will remain open to marine traffic. Demolition of Pier 1 removal is expected to last 2 months. Mariners should transit the area with caution.

Lake Lery. The crew will be operating 24-hours a day, 7-days a week, along the south shoreline of Lake Lery, in Plaquemines Parish, Louisiana. The crew will be monitoring VHF-FM Channels 10 or 16. Mariners are urged to transit the area with caution. For up-to-date information, mariners can contact Tommy Kilbride, at (985) 641-6243.

Chart 11364

LNM: 12-15

LA - LAKE LERY - Marsh Creation and Restoration

Continuing until approximately September 1, 2016, The Cutterhead Dredge BORINQUEN and attendant plant will be operating in the vicinity of Lake Lery, in Plaquemines Parish, Louisiana. The work zone perimeter will be bound by the following approximate positions:

29-48-07.22N 089-52-09.75W

29-48-24.81N 089-48-13.42W

29-46-58.71N 089-51-58.00W and

29-47-08.89N 089-47-57.98W

The current location of Weeks Quarter Boat is between approximate positions 29-46-50.0N 089-47-32.0W and 29-46-35.0N and 089-47-24.0W.

The dredge and attendant plant will operate 24-hours a day, 7-days a week. The dredge and attendant plant will be lighted at night according to U.S. Coast Guard regulations. The Cutterhead Dredge BORINQUEN and assisting tugs will be monitoring VHF-FM Channels 13 or 16. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

LA - PORT FOURCHON - ELMERS ISLAND - Dredge Operation

Continuing until approximately October 1, 2016, the Weeks Marine, Inc. "3301 Booster", Hydraulic Dredge E.W.ELLEFSSEN and attendant plant will be operating in the vicinity of Elmers Island, Lafourche and Jefferson Parishes. The staging area for equipment and attendant plant will be located southwest of Grand Isle Bridge bound by the following approximate positions:

29-12-30.0N 090-02-53.0W

29-12-14.0N 090-03-07.0W

Three submerged pipelines will be located offshore of Elmer's Island, bound by the following approximate positions:

PL Corridor No. 1:

29-07-16.0N 090-09-38.0W

29-06-44.0N 090-08-15.0W

PL Corridor No. 2:

29-07-59.0N 090-05-27.0W

29-08-50.0N 090-07-05.0W

PL Corridor No. 3:

29-08-41.0N 090-03-47.0W

29-10-11.0N 090-05-01.0W

Continuing until approximately October 1, 2016, the Hydraulic Dredge E.W.ELLEFSSEN, Hopper Dredge STUYVESANT, and attendant plant will be dredging fill material from a borrow area located in the Gulf of Mexico, bound by the following approximate positions:

28-55-00.12N 090-37-52.93W

LA - PORT FOURCHON - ELMERS ISLAND - Dredge Operation

28-55-09.24N 090-36-02.51W

28-54-26.75N 090-35-58.56W

28-54-20.88N 090-36-48.63W

Dredged material will be transported from the borrow area by barges/scows to a discharge point to be pumped to the beach through a combination of floating and submerged pipelines. The dredge and attendant plant will have all required U.S. Coast Guard lighting for night operations.

Dredging will be performed 24-hours a day, 7-days a week. The Hydraulic Dredge E.W.ELLEFSEN, Hopper Dredge STUYVESANT and tugs will be monitoring VHF-FM Channels 13 or 16. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

LA - HOUMA NAVIGATION CANAL - Pontoon Bridge Replacement/Waterway Closures

LDOTD has replaced the pontoon span of the LA State Route 7 (also known as the Falgout Canal Road) bridge across the Houma Navigation Canal, mile 23.1, near Dulac, Louisiana. The contractor continues to work on the new pontoon barge and required mechanical and electrical connections and will be working within the channel from 7:00 a.m. until 7:00 p.m., daily. Due to inclement weather, the project will not be completed until Friday, July 22, 2016. The waterway will be closed to remove the pontoon. All mariners are encouraged to use an alternate route. There will be a break in the operation allowing any build up of traffic to pass on a once daily basis. The waterway will be open for normal marine traffic all other times. For additional information, the point of contact can be reached on VHF-FM Channel 16 or by phone, at (504) 343-7928. Mariners should schedule operations accordingly.

LA - GULF OF MEXICO - ATCHAFALAYA BAY - NOAA Hydrographic Surveys

Commencing August 1, 2016 and continuing until approximately December 1, 2016, Ocean Surveys, Inc. (OSI) will be performing hydrographic and towed side scan sonar surveys of certain portions of the Gulf of Mexico generally southwest Atchafalaya Bay. The surveyed 4 corner area are bound by the following approximate positions:

NORTHWEST CORNER:

29-14-00N 091-57-00W

SOUTHWEST CORNER:

28-58-00N 091-57-00W

NORTHEAST CORNER:

29-14-00N 091-34-00W

SOUTHEAST CORNER:

28-58-00N 091-34-00W

Surveying will be performed 24-hours a day, 7-days a week. The M/V OCEAN EXPLORER will be monitoring VHF-FM Channels 13 or 16. The M/V OCEAN EXPLORER will be restricted in ability to maneuver due to the various towed instruments employed for the survey. Mariners are urged to transit the area at their slowest safe speed to minimize wake.

LA - MORGAN CITY TO PORT ALLEN - High Water Condition

Continuing until further notice, the COTP Morgan City has implemented the high water towing limitations for southbound towing vessels within Vessel Traffic Service Berwick Bay. Details of these limitations are set forth in Title 33, Code of Federal Regulations, Part 165.811 and the Vessel Traffic Service Berwick Bay user manual. For up-to-date information, mariners can contact MSU Morgan City, at (985) 380-5374.

Chart 11354

LNM: 27-16

LA - GIWW - MORGAN CITY TO PORT ALLEN - Temporary Emergency Vessel Movement Controls

LA - GIWW - MORGAN CITY TO PORT ALLEN - Temporary Emergency Vessel Movement Controls

The COTP Morgan City anticipates the Atchafalaya River Gauge may reach 5.0 feet. The COTP Morgan City directs the following temporary emergency vessel movement controls for Berwick Bay when the Morgan City River Gauge reads 5.0 feet or higher. South bound tows transiting the Morgan City bridges and west bound tows turning into the GIWW at Mile 98.5, WHL, will be limited to a maximum length of 600 feet. Towing vessels equipped with a properly operating bow steering unit and north bound tows through Morgan City bridges are exempt from temporary emergency vessel traffic movement controls. Additional deviations may be granted by Vessel Traffic Service Berwick on a case by case basis to any single towing vessel with 3,000 or more horsepower and tows with all empty barges. All tows remain subject to the Vessel Traffic Service Berwick Bay high water towing limitations. Mariners can contact U.S. Coast Guard MSU Morgan City at (985) 380-5374, for additional information.

TX - ARROYO COLORADO - Rio Hondo Bridge Rehabilitation

The FM 106 Vertical Lift Bridge across the Arroyo-Colorado River, mile 22.2, at Rio Hondo Bridge, will begin rehabilitation this month until November of 2018. The proposed work includes maintenance and rehabilitation to the mechanical/structural components of the bridge, the removing of paint and repainting, and construction of a retaining wall to stabilize the embankment around a backup generator pad. Updates will be provided concerning channel as provided. Project contactor is PCL Civil Constructors Inc., at (772) 201-3754. Mariners should exercise extreme caution when transiting the area.

Chart 11303

LNM: 19-16

TX - LAVACA BAY - Bridge Rehabilitation

Work has begun on rehabilitating the SH 35 bridge across Lavaca Bay, mile 8.2, at Port Lavaca, Calhoun County, Texas. Work will start during daylight hours from 7:00 a.m. to 8:00 p.m., on the west end of the bridge moving in an easterly direction as there are 194 spans. Presently, working Spans 130 - 198, from June 27 - July 29. Mariners should avoid these areas. The work consists of repairing spalled concrete columns, replacing web walls and damaged caps, and repainting of the bridge. Flex floats measuring approximately 40 feet x 8 feet in multiple configurations could obstruct an entire area between bents; but most commonly two units joined laterally may be combined in a work area with spuds placed near the piers. Barges will be properly lighted as required by the "Inland Navigation Rules of 1980" and accompanied by a 26-foot push boat, the M/V BARBARA ANN monitoring VHF-FM Channel 16, or onsite Project Manager, at (281) 831-7864. The main channel is located between Bents 116 and 117 with a horizontal clearance of 75 feet and a vertical clearance of 45 feet. Updates will be provided when main channel work is started. Estimated completion date of August 2017.

TX - BROWNSVILLE SHIP CHANNEL - Dismantle and Disposal of Navy Aircraft Carriers

Continuing until March 31, 2017, the International Shipbreaking Limited, LLC. Brownsville will be dismantling and disposing of 2 U.S. Navy aircraft carriers in Brownsville, TX. The west boundary will be in approximate position 25-57-50.80N 097-21- 50.0W and the east boundary will be in approximate position 25-57-57.80N 097-21-27.0W. All commercial vessels, tour vessels, and pleasure/fishing craft are required to remain within the channel while passing the International Shipbreaking facilities. There will be overhead industrial work in progress which can pose a hazard to vessels in the vicinity of the facility. For additional information mariners can contact Arnie Tyler, Facility Security Officer, ISL at (956) 371-6228 , email at Arnie.tyler@internationalshipbreaking.com or Dan Richardson, U.S. Navy On-Site Representative (OSR) at (207) 751-2906, email Daniel.Richardson@supshipba.navy.mil.

MARINE SAFETY INFORMATION BULLETIN

MSIB 009-16

Date: May 9, 2016

2016 HURRICANE SEASONAL ALERT

Hurricane Port Condition Requirements

This MSIB clarifies USCG mandated Hurricane procedures and defines Hurricane Port Conditions for Port Fourchon, Louisiana Offshore Oil Port, Houma, Port of Morgan City, Port of Iberia, Intracoastal City, and all terminals, facilities, and waterways in the Captain of the Port (COTP) Morgan City area of responsibility.

General Vessel and Barge Mooring Requirements for Heavy Weather

To promote safe navigation and protect vital infrastructure the Coast Guard will enforce the following regulations found in 33 CFR 803:

No person may secure a vessel or barge to trees or to other vegetation.

No person may allow a vessel or barge to be moored with unraveled or frayed lines or other defective or worn mooring.

No person may moor barges side to side unless they are secured to each other from fittings as close to each corner of abutting sides as practicable.

No person may moor barges end to end unless they are secured to each other from fittings as close to each corner of abutting ends as practicable.

Barge Moorings: Barge-to-barge; barge-to-vessel; barge-to-wharf or pier. The person in charge shall ensure that a barge moored to another barge, a mooring or spar barge, a vessel, a wharf, or a pier, is secured as near as practicable to each abutting corner of the barge being moored by:

(1) Three parts of wire rope of at least 7/8 inch diameter with an eye at each end of the rope passed around the timberhead, caval, or button;

(2) A mooring of natural or synthetic fiber rope that has at least 75 percent of the breaking strength of three parts of 7/8 inch diameter wire rope; or

(3) Fixed rigging that is at least equivalent to three parts of 7/8 inch diameter wire rope.

For further information regarding the severe weather and high water moorings, the U.S. Committee on the Marine Transportation System's recommends the Best Practices for Preventing and Managing Breakaway Vessels found at:

http://www.cmts.gov/downloads/Best_Practices_for_Preventing_and_Managing_Breakaway_Vessels.pdf.

In addition to setting port conditions, the COTP will take the following actions commensurate with each Port Condition:

Port Condition Whiskey (gale force winds within 72 hours):

Port Status: Open to all commercial traffic.

- Initiate Port Coordination Team conference calls to identify and address concerns over port status, activities and emergency preparations.
- The COTP will issue an MSIB requiring the following information to be submitted to Vessel Traffic Service, Berwick Bay:
 - (a) All self-propelled oceangoing vessels over 500 GT and all oceangoing barges and their supporting tugs remaining in port will complete and submit to the COTP within 24 hours for approval, a REMAINING IN PORT CHECKLIST FOR 500 GT (GRT) VESSELS (Annex A). Each vessel intending to remain in port must request permission from the waterfront facility where mooring and forward that information to the COTP.
- The Coast Guard will have increased harbor patrols and will advise vessel and facility operators of any conditions that require immediate action or correction.
- The Coast Guard will advise vessel operators of anticipated times of floodgate and bridge closures affecting their ability to seek safe refuge and will provide best points of contact information to obtain accurate updates.
- Advise port stakeholders of intentions for setting next condition.

Port Condition X-Ray (gale force winds within 48 hours):

Port Status: Open to all commercial traffic.

- The Coast Guard will continue to contact waterfront facilities to determine their intentions and any vessels moored thereto. Individually assess vessels desiring to remain in port, and issue COTP Orders as appropriate.
- Contact deep draft vessels at anchor and determine their intentions.
- Inspect wharf and pier areas with waterfront facility representatives during harbor patrols.
- Spot check mariners and waterways to determine the status of hurricane preparations.
- Advise port stakeholders of intentions for setting next Port Condition.

Port Condition YANKEE (Gale force winds expected within 24 hours):

Port Status: Vessel traffic control measures in effect.

- The COTP may close portions of the port in response to forecasted weather and actual damage, impact, or threat in different geographic areas within the port.
- Establish a Safety Zone controlling vessel movements and activities as appropriate, including:
 - (a) Close ports, where necessary, to all commercial vessel traffic except as specifically allowed by the COTP. Port closure will not apply to vessels that are capable of completing the cargo

load/discharge cycle in less than 12 hours. The area affected by this order includes all Navigable Waters of the United States within 12 nautical miles of shoreline.

- Issue COTP Orders, as appropriate, for any vessels or facilities not complying with Port Condition requirements:
 - (a) Each self-propelled vessel over 500 GT without COTP approval to stay in port will be directed out of port.
 - (b) The COTP will approve or direct, as necessary, final mooring arrangements for vessels remaining in port.
- Advise port stakeholders of intentions for setting next Port Condition.
- Establish safety zone preventing red flagged barges from mooring along shore in the Houma central business district.

Port Condition Zulu (gale force winds expected within 12 hours):

Port Status: Vessel traffic control measures in effect. The default for ZULU is closure of the port and facility operations.

- The COTP may deviate from this default and keep ports open with restrictions and close only portions of the port in response to forecasted weather, actual damage, impact, or threat in different geographic ports within the COTP Zone.
- Establish a Safety Zone controlling vessel movements and activities as appropriate, including:
 - (a) Close ports, where necessary, to all commercial vessel traffic (including vessel transits within the port). This prohibition will not apply to vessels that have requested and received approval from the COTP to transit the port. The approval of the COTP will only be granted if the transit can be made safely and mooring or anchorage space has been identified; or if the vessel is departing to sea, only if the vessel can reach safe water prior to encountering hurricane conditions.
- Suspend cargo operations involving bulk liquid dangerous cargoes (including bunkering and lightering operations), unless permission is requested to continue operations and approval is granted. Approval will be given on a case-by-case basis. This approval provision does not apply to operations involving Cargoes of Particular Hazard or Certain Dangerous Cargoes, which in every case must be suspended.

Post-Hurricane Conditions

As soon as practicable following the passage of the storm, the COTP will:

- Assess whether to close ports and waterways, maintain closure, or open with or without restrictions.
- Assess whether to maintain a Safety Zone restricting vessel movements until the navigation channels can be surveyed and declared safe for passage.
- Coordinate completion of channel surveys as needed.
- Conduct maritime damage and risk assessments with emphasis on channels, bridges, anchorages, piers, and wharves.

- Initiate a post-hurricane Port Coordination Team conference call to assess, outline, and prioritize the recovery effort for the COTP Zone.

All hurricane informational documents will be posted to Homeport under the "Safety and Security" section for Morgan City, and may be accessed via the following link:

<http://homeport.uscg.mil/morgancity>

If you have any questions, please contact Marine Safety Unit Morgan City's Planning staff at (985) 380-5318 or the Waterways Management staff at (985)380-5334.

D. G. McClellan
Captain, U.S. Coast Guard
Captain of the Port
Morgan City, Louisiana

Marine Safety Information Bulletin

06-16

May 27, 2016

HURRICANE SEASON BEGINS JUNE 1st

All facilities, vessels, service companies, and organizations in the Port Arthur Captain of the Port Zone should have their hurricane plans completed prior to the beginning of hurricane season.

If deep draft vessels expect to remain in port during a hurricane, a Heavy Weather Plan and *Remaining in Port Checklist* must be completed and submitted to MSU Port Arthur at least 72 hours prior to the arrival of gale force winds.

Hurricane Planning Information, including the *Remaining in Port Checklist* for ships and tug/barges, is available at <http://www.uscg.mil/d8/vtspportarthur/hurricanes.asp> and [http://homeport.uscg.mil/contingency plans/local contingency plan](http://homeport.uscg.mil/contingency%20plans/local%20contingency%20plan).

From our experience with previous storms, the following recommendations are offered:

- Deep draft vessels should depart the port for sea, when at all possible, well in advance of approaching tropical weather systems.
- Commercial boat and barge tows that normally transit the Intracoastal Waterway should depart the area or move as far inland as possible on our rivers and bayous in order to establish secure moorings.
- Facilities with storage tanks should take preventative action to secure their tanks by any appropriate means, including pressing up, flooding, or cutting holes.
- Commercial fishing vessels that cannot leave port should find shelter as far north on our rivers and bayous as possible to increase their chances of surviving a tropical weather system. When Hurricane RITA, a Category Two storm, made landfall in 2005, not one of the approximately 80 commercial fishing vessels that were moored in the Sabine River south of Texaco Island survived. However, fishing vessels that sought shelter on the upper Neches River during Hurricane IKE in 2008 suffered little or no damage.

In order to ensure continuity of Coast Guard operations during a significant storm, MSU Port Arthur personnel will relocate to a secure area and establish a remote Command Post prior to arrival of the tropical weather system. Communications from the Command Post will be facilitated by all available means, including radios, mobile telephones, email, and Web site postings.

This notice will be posted on the HOMEPORT website at <http://homeport.uscg.mil>. If you have any questions, please contact MSU Port Arthur at (409) 723-6500.

R. S. OGRYDZIAK
Captain, U.S. Coast Guard
Captain of the Port

UNITED STATES COAST GUARD SECTOR NEW ORLEANS

MARINE SAFETY INFORMATION BULLETIN

Volume XV Issue: 068

Time: 0930

Date: JUN 01 2016

Hurricane Season 2016

The 2016 Hurricane Season commences June 1st and continues through November 30th. You are strongly encouraged to review your existing hurricane plan or develop a plan if you do not have one. It is extremely important to decide in advance how to minimize your risk and be prepared to evacuate, if necessary.

The Captain of the Port (COTP) will be setting hurricane port conditions in accordance with the Maritime Hurricane Contingency Port Plan (MHCPP). The MHCPP is available at Coast Guard Homeport at <http://homeport.uscg.mil/nola>. You are encouraged to review this plan. It describes what actions the COTP will take in anticipation of a hurricane or tropical weather conditions. This plan outlines the requirements of each port condition and includes information regarding vessel movements and mooring requirements during anticipated landfall.

Furthermore, the COTP would like to emphasize the importance of properly maintaining and securing your equipment during hurricane season.

Important hurricane-related information will be provided to the maritime community, as needed, through Marine Safety Information Bulletins (MSIB) and Broadcast Notice to Mariners (BNM).

Hurricane Regulated Navigation Area (RNA) Annual Operation Plans

The Coast Guard published the newly revised Hurricane Final RNA in April of 2014. In order to comply with the new requirements of the RNA, you are strongly encouraged to thoroughly review the Regulation in 33 CFR 165.838. According to the RNA, all floating vessels are prohibited from entering or remaining in the IHNC, Harvey Canal, and Algiers Canal, while the RNA is enforced; however, the COTP may review Annual Hurricane Operation Plans, including mooring systems certified by Professional Engineers, which ensure compliance with the newly promulgated RNA Final Rule. Plans should be submitted as soon as possible, as this RNA will be enforced in its entirety for the 2016 Hurricane Season. The official Federal Register citation for this rule is 79 FR 21129. The Code of Federal Regulations (CFR) citation for this rule is 33 CFR 165.838.

Major Operation Plan requirements for vessels that intend on remaining within the RNA:

- **West Side:** Certification by a professional engineer that mooring arrangements will withstand winds of up to 140 mph, surge water level of 11 ft, current of 4 mph, and wave height of 3 feet in the RNA.
- **East Side:** Certification by a professional engineer that mooring arrangements will withstand winds of up to 140 mph, surge water level of 8 ft, current of 4 mph, and wave height of 2.5 feet in the RNA.
- Description of the maximum number of vessels intended to be moored at a facility's location.
- Detailed plans for any vessels which will be sunken or grounded in place in the event of RNA enforcement.
- Diagram of the facility and fleeting area.
- Vessel name, call sign, official number, and operational status of machinery onboard

UNITED STATES COAST GUARD SECTOR NEW ORLEANS

MARINE SAFETY INFORMATION BULLETIN

Volume XV Issue: 068

Time: 0930

Date: JUN 01 2016

Hurricane Season 2016

- Vessel characteristics.
- 24-hour emergency contacts for qualified individuals.

In addition to the professional engineer certification, facility owners shall comply with or complete the following:

- Provide full insurance disclosure to the COTP. Vessels moored to a facility shall provide insurance information to the facility.
- Complete weekly inspections during hurricane season.
- Maintain facility records of inspections.
- Meet on-scene tug boat requirements during an approaching tropical event.

Once again, detailed requirements mentioned above can be found in the actual Final Rule at the Federal Register, or in 33 CFR 165.838.

For further information, contact:

Coast Guard Waterways Management: (504) 365-2280

Coast Guard Sector New Orleans Command Center: (504) 365-2200

CAPT W.R. ARGUIN JR.
Acting Captain of the Port, New Orleans

For a current list of MSIBs within the COTP New Orleans Zone visit <https://homeport.uscg.mil/nola>, and look under "Safety and Security."

With the planning for the use of the GIWW Alternate Route- from Baptiste Collette to Gulport, marine and coastal weather, winds, sea state are a very important issue for safe transits by the tow and other navigation interests.

Spot weather and marine forecasts are available from NOAA using the NOAA NWS EDD site, the link is -- <http://preview.weather.gov/edd/>
<https://urldefense.proofpoint.com/v2/url?u=http-3A__preview.weather.gov_edd_&d=CwMCAQ&c=0NKfg44GVknAU-XkWXjNxQ&r=nEPe3hNapQR0cCEMUUymIjpFTIDYVxkW0XFApr0yZuo&m=6pNltkbp3QhMmRle6uw9r8CJif4WXawAzglE0eq8jiQ&s=Bpu5GHMHMBEXvnpXcUp15KZaSCA6vZ5K2--ZCP11IOY&e=>

I have set up a specific view of the area of the Alternate Route transit area. You can see this on your computer by clicking on the link--
<http://go.usa.gov/chU8G> <https://urldefense.proofpoint.com/v2/url?u=http-3A__go.usa.gov_chU8G&d=CwMCAQ&c=0NKfg44GVknAU-XkWXjNxQ&r=nEPe3hNapQR0cCEMUUymIjpFTIDYVxkW0XFApr0yZuo&m=6pNltkbp3QhMmRle6uw9r8CJif4WXawAzglE0eq8jiQ&s=SM0R63aLwoJouN6JWi_gFETJPaiuDGsAx00KdDQF6TY&e=>

However- anyone using this Route can scroll into the area of the transit, from the opening map, click on a spot of the transit, and then see a forecast table appear. You can then click on the various tabs at the top of the table for weather and marine forecasting.

<http://preview.weather.gov/edd/>
<https://urldefense.proofpoint.com/v2/url?u=http-3A__preview.weather.gov_edd_&d=CwMCAQ&c=0NKfg44GVknAU-XkWXjNxQ&r=nEPe3hNapQR0cCEMUUymIjpFTIDYVxkW0XFApr0yZuo&m=6pNltkbp3QhMmRle6uw9r8CJif4WXawAzglE0eq8jiQ&s=Bpu5GHMHMBEXvnpXcUp15KZaSCA6vZ5K2--ZCP11IOY&e=>
<http://go.usa.gov/chU8G> <https://urldefense.proofpoint.com/v2/url?u=http-3A__go.usa.gov_chU8G&d=CwMCAQ&c=0NKfg44GVknAU-XkWXjNxQ&r=nEPe3hNapQR0cCEMUUymIjpFTIDYVxkW0XFApr0yZuo&m=6pNltkbp3QhMmRle6uw9r8CJif4WXawAzglE0eq8jiQ&s=SM0R63aLwoJouN6JWi_gFETJPaiuDGsAx00KdDQF6TY&e=>

Use of the NOAA NWS EDD Route Forecasting- using the left hand controls- scroll down to 'Mouse Click Control' and select the tab underneath it and click 'Marine Travel Hazard Forecast'

I selected a route from Baptiste Collette to Gulfport- with the tow leaving the mouth of Baptiste Collette at noon today. I selected the speed of the transit at 5 knots and then clicked on the 'Go' button-

As you scroll along the line of the transit-- you will see the time the tow will arrive there and the marine conditions at that time, at that location.

Below you will find a NOAA NWS YouTube tutorial for you to learn more about this resource.
